THIRD QUARTER INCOME STATEMENT REVIEW

Net income for the quarter ended September 30, 2017, was \$49.7 million, an increase of \$3.6 million, or 7.8%, compared to net income of \$46.1 million for the same quarter a year ago. Diluted earnings per share for the quarter ended September 30, 2017, was \$0.61 compared to \$0.58 for the same quarter a year ago.

Return on average stockholders' equity was 9.77% and return on average assets was 1.29% for the quarter ended September 30, 2017, compared to a return on average stockholders' equity of 10.30% and a return on average assets of 1.38% for the same quarter a year ago.

Net interest income before provision for credit losses

Net interest income before provision for credit losses increased \$29.4 million, or 28.3%, to \$133.2 million during the third quarter of 2017 compared to \$103.8 million during the same quarter a year ago. The increase was due primarily to an increase in interest income from loans from organic growth and from the acquisition of FENB and a decrease in interest expense from securities sold under agreements to repurchase.

The net interest margin was 3.75% for the third quarter of 2017 compared to 3.36% for the third quarter of 2016 and 3.63% for the second quarter of 2017. The increase from the second quarter of 2017 was primarily the result of interest recoveries and prepayment penalties of \$5.6 million, including \$4.5 million from the payoff of a loan that had been on nonaccrual status in prior years.

For the third quarter of 2017, the yield on average interest-earning assets was 4.34%, the cost of funds on average interest-bearing liabilities was 0.81%, and the cost of interest-bearing deposits was 0.68%. In comparison, for the third quarter of 2016, the yield on average interest-earning assets was 4.02%, the cost of funds on average interest-bearing liabilities was 0.89%, and the cost of average interest-bearing deposits was 0.70%. The increase in the yield on average interest earning assets was a result of higher interest rates and increases in interest income collected from nonaccrual loans and loan prepayment penalties. The net interest spread, defined as the difference between the yield on average interest-earning assets and the cost of funds on average interest-bearing liabilities, was 3.53% for the quarter ended September 30, 2017, compared to 3.13% for the same quarter a year ago.

Provision/(reversal) for credit losses

There was no provision for credit losses recorded for the third quarter of 2017 or 2016. The provision/(reversal) for credit losses was based on a review of the appropriateness of the allowance for loan losses at September 30, 2017. The following table summarizes the charge-offs and recoveries for the periods indicated:

(1) Real estate loans include commercial mortgage loans, residential mortgage loans, and equity lines.

Non-interest income

Non-interest income, which includes revenues from depository service fees, letters of credit commissions, securities gains (losses), wire transfer fees, and other sources of fee income, was \$13.0 million for the third quarter of 2017, an increase of \$4.2 million, or 47.7%, compared to \$8.8 million for the third quarter of 2016, primarily due to the gain of \$5.4 million on the acquisition of SinoPac Bancorp that was offset by a decrease in securities gains of \$1.7 million from the quarter a year ago.

Non-interest expense

Non-interest expense increased \$10.5 million, or 20.7%, to \$61.2 million in the third quarter of 2017 compared to \$50.7 million in the same quarter a year ago. The increase in non-interest expense in the third quarter of 2017 was primarily due to a \$5.0 million increase in salary and employee benefit expenses and a \$3.3 million increase in acquisition related expense when compared to the same quarter a year ago. Acquisition related expenses during the third quarter totaled approximately, \$3.3 million, including \$2.8 million in legal and investment banking fees and \$0.5 million in severance and retention expenses. The efficiency ratio was 41.9% in the third quarter of 2017 compared to 45.1% for the same quarter a year ago.

Income taxes

The effective tax rate for the third quarter of 2017 was 41.4% compared to 25.5% for the third quarter of 2016. The third quarter 2017 effective tax rate of 41.4% reflected additional tax expense to increase the full year effective tax rate to 34% compared to the 29% effective tax rate forecasted at June 30, 2017. This adjustment in the third quarter was the result of lower tax credits from the slow deployment of alternative energy investments. Income tax expense for the first quarter of 2017 was also reduced by \$2.6 million in benefits from the distribution of restricted stock units and exercises of stock options.
